

Badar Ali

Software Engineering Student | Backend & Full-Stack Developer

+92-326-2119700 | badaralinaqvi512@email.com | badarali.vercel.app | linkedin.com/in/badarali5 | github.com/badarali5

SUMMARY

Full-stack Software Engineering student at FAST NUCES (Class of 2028) specializing in backend systems and cloud-native deployment. Built and shipped FAST Notes Hub, a production platform serving 2,100+ active students with 31K+ events. Proficient in Java, Spring Boot, PostgreSQL, and Docker; comfortable owning the full stack from schema design and REST API development to CI/CD pipelines and frontend delivery.

EDUCATION

National University of Computer and Emerging Sciences (FAST NUCES) Karachi, Pakistan
Bachelor of Science in Software Engineering 2024-2028
– Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Probability and Statistics, Software Design and Architecture

Whales College Karachi, Pakistan
A Levels – Cambridge International Examinations 2022-2024

PROJECTS

FAST Notes Hub | *TypeScript, React.js, Supabase, TailwindCSS, GitHub API* 2024 – Present
– Shipped a university-wide notes and past-papers platform serving **2,100+ active users**, **31K+ total events**, and a **60% engagement rate** — a live product with real, measurable impact.
– Reduced file load times by **35%** via GitHub API pagination and request batching.
– Designed a normalised Supabase schema with **row-level security (RLS)**, indexed queries, and client-side caching for sub-second search performance.
– Delivered a fully responsive UI with advanced filtering, fast routing, and state-managed previews using TailwindCSS.

GetJob | *Spring Boot, PostgreSQL, Docker, Railway, GitHub Actions* 2024
– Built a job-finder platform targeting internships and entry-level roles with a production-ready backend architecture.
– Cut average API latency by **28%** through optimised PostgreSQL queries; load-tested and validated under **500+ concurrent users**.
– Implemented a full CI/CD pipeline with **GitHub Actions + Docker**: automated tests, containerised builds, and zero-downtime deployments to Railway.
– Added structured exception handling, input validation layers, and rate limiting for production-level reliability.

CricZone | *Spring Boot, PostgreSQL, React.js, REST APIs, Docker* 2024
– Developed a full-stack cricket management system using a 1000-match historical dataset from ESPN Cricinfo, supporting team creation, match scheduling, and player statistics.
– Secured REST APIs with **JWT authentication** and **role-based access control (RBAC)**, ensuring data integrity and reliable session handling.
– Constructed relational schemas with optimised joins for complex aggregated stats queries; scheduled background jobs via Spring's **TaskScheduler**.
– Reduced environment boot and deployment time by **40%** via Docker + Railway; maintained reliability with **JUnit** test coverage.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, C, HTML, CSS
Frameworks & Libraries: Spring Boot, React.js, Tailwind CSS
Databases: PostgreSQL, Supabase, Oracle SQL
DevOps & Tools: Docker, GitHub Actions (CI/CD), Railway, Vercel, Netlify, Render, Git, GitHub
Testing: JUnit, Jest
Concepts: REST APIs, JWT Auth, RBAC, Row-Level Security, Database Normalisation, Agile/Scrum

CERTIFICATIONS & ACHIEVEMENTS

- **Web Forces by PROCOM'26** | *PROCOM – IEEE FAST NUCES* Feb 2026
Competed in a university-level web development competition; recognised for debugging and analytical skills.
- **Coder's Cup 2025** | *ACM FAST NUCES Karachi* Oct 2025
Competitive programming contest; applied problem-solving under time constraints and critical analysis.
- **DevDay'26** | *PROCOM – FAST NUCES* Feb 2026
Participated in a full-day developer conference covering modern software engineering practices.
